

URBAN
GREENS

SUBURBAN LIVING AT ITS BEST

Let Nature Nurture You

Powered with the purpose to deliver a luxurious lifestyle against nature's magnificent background, Urban Greens is unique in amalgamating pastoral landscapes with modernised architecture to provide residents with a serene and rejuvenating living experience free of the teeming racket of city-life.

W e l c o m e T o
Urban Greens

Developed by Urban Greens

This project envisions a community that is encompassed with vast green spaces and grand villas, where residents can experience a refined and nature-centric living experience. The health and well-being of our residents will be ensured not only through the provision of outstanding wellness centres and beautiful recreational parks, but also through our Farm-to-Table philosophy that aims to supply fresh, healthy produce and proteins.

The blend of country-style communities and urban livelihood makes Urban Greens an exclusive and elite choice for residents looking to embrace a serene and vibrant lifestyle.

Our Vision

We intend to provide an opulent living experience that is refined through nature's tranquil presence. Our aim is to foster a community that is a testament to our vision of encouraging health, fitness as well as environmental sustainability.

Our Mission

To provide a unique living experience by including the serenity of nature with contemporary amenities, fostering a community that values wellness, outdoor activities, & environmental sustainability.

Our Values

Naturalistic

Green spaces and vistas stand at the epicentre of our philosophy as we prioritise sustainability & the presence of natural elements in all aspects of the community.

Wellness

Our diverse recreational fitness facilities, such as horse riding clubs and sports facilities, as well as organic farming and agricultural practices, exemplifies our commitment to health & wellness.

Community

At our heart, we value fostering a sense of belonging to our residents and providing a welcoming community that makes them feel at home.

Sustainability

We recognise the importance of sustainable and eco-friendly living practices and encourage such operations alongside progress.
